Career Objective

With strong technical skills and over 1 year of experience in web development,

I am seeking a role as a Front-end Developer. I have a proven ability to build projects from scratch to final deployment, delivering effective and user-centric solutions on time.

I specialize in creating responsive, high-performance web applications that enhance user experience.

My technical expertise includes:

- Crafting responsive and accessible web designs using HTML5, CSS3, Tailwind CSS, JavaScript, and jQuery
- Building high-performance single-page applications (SPAs) with React and Next.js
- Experience with TypeScript for writing safer and scalable JavaScript code
- Implementing state management using tools like Redux and Context API
- Familiarity with REST APIs and fetching data using Axios or fetch API
- Basic understanding of Node.js and Express.js for backend integration
- Proficient in using Git and GitHub for version control and collaboration
- Comfortable with npm, yarn, and webpack for package management and bundling
- Familiarity with component libraries like Shadcn UI, Material UI, and Next UI to speed up development

Latest Works

Thrivext – Documentation Site

Frontend Developer | [Live Site](#) | [GitHub](#)

Built a modern documentation site using Next.js, Nextra, and TailwindCSS, leading the project in a collaborative environment.

Nasafits – Ecommerce Platform

Full Stack | [Live Site](#) | [GitHub](#)

Developed a full-stack e-commerce site with user authentication, cart functionality, checkout system, and admin/user dashboards using MERN Stack.

Mezzban City – Restaurant Website

Frontend Developer | [Live Site](#) | [GitHub](#)

Created a stylish, fully responsive restaurant website with Next.js and TailwindCSS, featuring menu showcases and online booking.

Pixll – Agency Landing Page

Frontend Developer | [Live Site](#) | [GitHub](#)

Built a responsive agency landing page showcasing Pixll's services. Focused on clean UI, fast performance, and scalable layout using modern frontend tools.
